

MARC RUIZ

AI Software Engineer | AI, Python, Java & Kotlin Specialist

📍 St Julien en Genevois, 74160, France | ☎ +34 661 755 451
✉ markusrc11@gmail.com | 🔗 [linkedin.com/in/marcruiz11](https://www.linkedin.com/in/marcruiz11) | 🐙 github.com/markusrc11

PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience designing and delivering scalable software solutions across mobile and AI-powered products. Strong expertise in **Python, Java/Kotlin** and modern backend architectures, with hands-on experience integrating **LLMs, AI agents and multilingual AI solutions** into production environments. Proven track record of building end-to-end products, from technical design and architecture to deployment, working across **backend, frontend and AI systems**. Experienced in asynchronous processing, distributed workloads and maintainable software design.

Passionate about solving complex problems, collaborating in international environments and building reliable products that deliver measurable business impact.

Open to **remote roles** and **relocation**.

TECHNICAL SKILLS

Languages: Python, Java, Kotlin, JavaScript, SQL, Bash/Shell

AI & LLMs: OpenAI, LangGraph, AI Agents, LLM integration, prompt engineering, multilingual AI systems

Backend: Django, OpenERP/Odoo, REST APIs, Celery, Redis, asynchronous processing, task queues

Architecture: Domain-Driven Design (DDD), clean architecture, microservices, scalable systems design

Frontend: React, Alpine.js, TailwindCSS

Mobile: Android Development (Java, Kotlin), Bluetooth, USB communication

Databases: PostgreSQL, MySQL, Oracle, MongoDB, Redis

DevOps & Infrastructure: Docker, Linux, AWS (EC2, S3), Git, GitHub Actions, Jenkins

Testing & Methodologies: JUnit, Mamba (Python BDD), Scrum, Agile

PROFESSIONAL EXPERIENCE

Spoki

Remote (Italy)

AI Software Engineer | January 2025 – Present

- Integrated **LLM-based AI capabilities** into a WhatsApp automation platform, ensuring **multilingual support**, strict output constraints and production-grade reliability.
- Built an **AI-driven auto-fill system** spanning multiple services (AI, backend and frontend), reducing customer onboarding friction and manual processes.
- Owned the end-to-end implementation of **AI image generation features**, from technical specification and architecture design to production deployment.
- Developed scalable asynchronous workflows using **Redis, Celery and task queues** to efficiently process AI operations.
- Collaborated with product and engineering teams to deliver scalable AI solutions supporting large-scale automated WhatsApp interactions.

STUDENTAN.COM

Remote (Geneva based)

Full Stack Developer (Freelance) | April 2025 – Present

- Took full ownership** of an existing web platform, refactoring the codebase to improve performance and stability
- Redesigned** components using **PHP** and **Domain-Driven Design (DDD)** principles, making the code easier to maintain and scale

- Improved the frontend interface using **Alpine.js** and **TailwindCSS**, resulting in a faster and more responsive user experience

GISCE-TI SL

Girona, Spain

Software Engineer | Dec 2021 – January 2026

- **Led the management and development** of a native **Android application (Kotlin & Java)** used to process **hundreds of electricity meter readings monthly** via Bluetooth and USB
- **Managed client expectations**, translating business needs into technical user stories and acceptance criteria
- **Significantly reduced human error** by automating manual reading processes for field technicians
- **Ensured mobile code reliability** through unit testing with **JUnit**, minimizing production bugs
- Developed custom modules for the **OpenERP solution using Python**, automating internal processes for the electricity industry
- **Integrated MongoDB and Redis** into the ERP ecosystem to enable **real-time data management**, ensuring efficient processing of high-volume meter readings
- Collaborated in an Agile environment using **Trello** for task management and tracking

GLAM SOFTWARE

Girona, Spain

Software Engineering Intern | Feb 2021 – May 2021

- **Developed and enhanced user interfaces** for both the corporate website and the internal ERP/CRM system using **React.js**
- **Optimized database performance** by analyzing and refactoring complex queries in **SQL and NoSQL** environments, reducing data retrieval times

NEWRONIA SL

Girona, Spain

Software Developer | Nov 2016 – Dec 2019

- Developed an **Android (Java)** application for indoor geolocation, using GPS and Wi-Fi signals to track devices inside buildings
- Led the end-to-end product delivery, from initial requirement gathering with clients to final production rollout and user training
- **Deployed a route calculation engine on AWS**, processing uploaded instruction files to generate optimized logistics plans for a fleet of **50+ trucks**
- Improved logistics efficiency by implementing **AI-driven solutions** using **Java and Python**, utilizing **Shell scripting** for server automation
- Applied **Mamba** for Python testing to validate algorithm behaviors and ensure route accuracy

EDUCATION

Bachelor's Degree in Computer Engineering (Grade: 8.75/10)

2017 – 2021

Universitat de Girona

HNC in Multiplatform App Development (Grade: 9.25/10)

2015 – 2017

IES Rafael Campalans

VET in Microcomputer Systems and Networks (Grade: 9.75/10)

2013 – 2015

IES Rafael Campalans

LANGUAGES

Spanish & Catalan: Native | **English:** C1 (Professional) | **French:** B1 (Intermediate)
